

Prime Minister
Prime Minister's Office
Tokyo, Japan
(c/o Consulate General of Japan in Hong Kong)

December 5, 2011

Dear Mr. Noda Yoshihiko,

Stop Disinforming the World on Nuclear Radiation Risks; Protect Japanese People especially the Children; and Phasing out of All Nuclear Power

Due to the seriousness of radiation contamination by Fukushima Daiichi Nuclear Power Plant and the gross negligence by your government of the harm suffered by the Japanese people, we call for your government to redress grievances at policy level with no delay. Our demands are:

1. Immediately evacuate all the people living in Fukushima, particularly the 360,000 children who are most vulnerable to radiation harm; and assist the people to rebuild their livelihood in their nuclear-free new homeland.
2. The Japanese government to instruct TEPCO to honestly disclose the health records of the 18,000 labor workers who have been employed, directly or by subcontractors, to clean up the Fukushima Daiichi Nuclear Power Plant since March 11, 2011.
3. The Japanese government to acquire Food Radiation Counters and Whole Body Radiation Counters for communities within 1,500,000 square kilometers of Fukushima Daiichi Nuclear Power Plant*. It should also hire independent experts who have experience and reliable research in low dose radiation exposure sicknesses, such as Dr. Chris Busby (scientific secretary, European Committee on Radiation Risks) and scientists at Belrad, Belarus, to monitor children's health.
4. The Japanese government to work with other Asian countries for a Nuclear-Free Asia with immediate effect, and stop exporting nuclear technologies to other countries.
5. The Consul-General for Japan in Hong Kong to stop releasing untrue information to create false sense of security for Hong Kong people by downplaying the harm caused by radioactivity contamination in Japan.

** The Chernobyl nuclear disaster having the same rating of Level 7 as the Fukushima disaster, has caused significant radioactivity contamination in the expanse of 1,500,000 square kilometers.*

Yours Sincerely,

Hong Kong Alliance Against Nukes 反核之眾(香港)
